PROFESSIONAL SUMMARY

A results-driven Computer Science student at Ateneo de Davao University with a proven track record of designing, building, and deploying enterprise-grade web and mobile applications. Demonstrated frontend lifecycle experience through a completed On-the-Job Training (OJT) engagement with DOLE INC - Sarangani Resources Corporation, where I co-engineered and successfully published their production web portal by replacing legacy layout blocks with a modern, performance-focused minimalist typography framework. Adept at bridging the gap between high-fidelity UI/UX design and scalable engineering using Figma, HTML, CSS, React, TypeScript, and Tailwind CSS. Highly focused on creating fluid, accessible digital solutions that optimize whitespace, maintain absolute cross-viewport layout responsiveness, and integrate data tracking frameworks like Google Analytics (GA4) without sacrificing web performance.

EDUCATIONAL BACKGROUND

Ateneo de Davao University (2023 - Present)	Bachelor of Science in Computer Science President's Lister, Dean's Lister
Ateneo de Davao University - Senior High School (2021-2023)	STEM: Pre-Engineering and Architecture With High Honors
Ateneo de Davao University High School (2017-2021)	3rd Honors

TECHNICAL SKILLS

Programming Languages:	C, C++, Python, JavaScript, Dart, Typescript
Markup & Styling:	HTML, CSS, Tailwind CSS
Frameworks & Technologies:	Next.js, React.js, Flutter, Prisma, Supabase, MySQL
Tools & Platforms:	Visual Studio Code, Android Studio, Figma, Canva, Cisco Packet Tracer
Core Competencies:	UI/UX Design, Responsive Web Design, Full Stack Mobile and Web Developer, Prototyping, Wireframing

PROJECTS

Sarangani Resources Corporation Web Portal Enterprise Frontend Development & Analytics Integration | Co-Developer & UI/UX Designer | May 2026

- Co-engineered a production-ready enterprise web asset portal for a premier PEZA industrial developer, refactoring legacy layout blocks into a modular, high-end typography hierarchy built on a fluid grid system to ensure architectural consistency across all routes. Designed intuitive, clean user interfaces focused on whitespace optimization, structural balance, and seamless responsive alignment for localized web elements. Simultaneously integrated Google Analytics (GA4) site tags into the React/Next.js layout architecture using optimized rendering strategies to track real-time portal telemetry and user interactions while preventing cumulative layout shifts across mobile, tablet, and desktop viewports.

Samal Island Ferry Queue System

CS Elective 1: Multi-Platform Development | Full-Stack and UI/UX Developer | April 2026

- Developed a comprehensive multi-platform ferry operations management system using Dart, Flutter, and Supabase, enabling real-time queue tracking between Sasa and Samal ports, barge management, schedule coordination, and administrative dashboard functionality while optimizing UI/UX design and system performance. The system facilitates seamless ferry operations managing routes from Sasa to Samal and vice versa with real-time queue monitoring for both departure terminals.

East LA Chemicals Ecommerce System

Software Engineering 1 & 2 | UI/UX Developer, Full Stack Developer | May 2025

- Contributed to the full-stack development of a comprehensive web and Android e-commerce and POS platform for East LA Chemicals. Designed intuitive user interfaces using Figma and built responsive front-end components with Next.js, React.js, TypeScript, and Tailwind CSS. Simultaneously engineered robust back-end APIs, authentication, and database schemas using Prisma, and Supabase to seamlessly power complex enterprise modules, including online ordering, production tracking, sales generation, and delivery management.

PAWS Website

Event Driven Programming | Front-End and UI/UX Developer | April 2025

- Developed a responsive resort website front-end using HTML, CSS, and JavaScript in Visual Studio Code, translating high-fidelity Figma prototypes into a functional user interface. The project focused on implementing fluid layouts and interactive elements to improve usability, accessibility, and seamless user navigation across mobile, tablet, and desktop devices.

EXPERIENCE & AFFILIATIONS

DOLE INC.- SARANGANI RESOURCES CORPORATION

- Website Developer

DeliSoft Studios

- Builder
- Texture Coder

Computer Studies Student Executive Council (CSSEC)

- Secretariat Committee Member (2026)

Ateneo de Davao Mathematics Society (AdDaMS))

- Logistics Committee Member (2024 - Present)
